

STATSAFE MED MANAGEMENT

StatSafe™ provides immediate automated on-site access to stock medications without the manual-tracking hassles and missed billing-opportunities that is symptomatic of a manual emergency-med box. Each drawer and narcotic box has its own independent lock and status light. Also, it will track and manage "other" locations such as a refrigerator. The pharmacy has anytime, anywhere access to real-time information via the StatSafe™ Web Portal.

The pharmacy manages all facets of the system including inventory, expiring meds, staff, users, patients, drawer configuration, and more via the web portal. Best of all, it is priced dramatically less than rival systems.

CHANGE EXPENSES INTO REVENUE

StatSafe™ may be outfitted on a Phoenix medium or large cart cabinet. This allows StatSafe™ to accommodate an extensive medication stock that nearly eliminates expensive stat-pharmacy deliveries.

SUPER SIMPLE INSTALLATION

Just stock it, plug it in and power it up. No phone lines or Ethernet cable because StatSafe™ communicates with the cloud via Wi Fi or 4G. Also, training is a breeze! If the staff can operate a cell phone, they will engage the StatSafe™ functions with ease. Lastly, there is no need to install IT hardware or setup any VPNs in the pharmacy.

SAFE AND SECURE

The StatSafe™ appreciably reduces the odds of a medication error with its unique serialized-location and PIN system. There are numerous security features too. A new photo is taken at each and every login session for access verification. The login photo is attached to each time-stamped transaction along with a unique ID. Other security options are available such as blind count audits, independent drawer security, witness requirement, and unique access PINs.

SECURITY AND IRREGULARITY INDICATORS

A new photo is taken at each and every login session for access verification. The login photo is attached to each time-stamped transaction along with a unique ID. Other security options are available such as blind count audits, independent drawer security, witness requirement, and unique access PINs.

INFORMATION RICH

The pharmacy has anytime, anywhere access to real-time information via the StatSafe™ Web Portal. The pharmacy manages all facets of the system including inventory, expiring meds, staff, users, patients, drawer configuration, and more via the web portal.

SAFETY

The StatSafe's™ serialized location and PIN appreciably reduces the odds of a medication error. The PIN verifies the correct med has been picked, allowing the transaction to be completed.

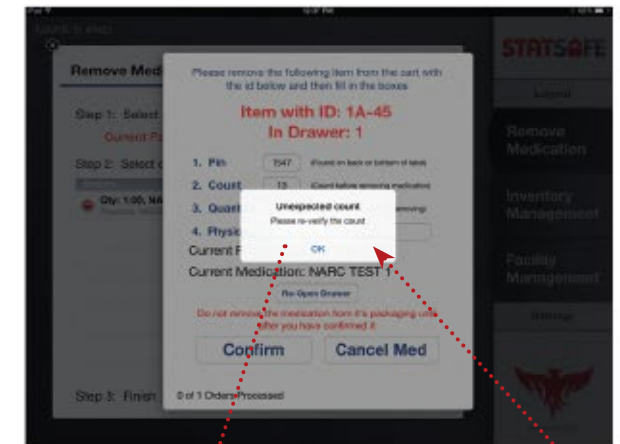

CUSTOM CONFIGURE

Choose from any combination of 4", 6", 9", 11" or 12" drawers.

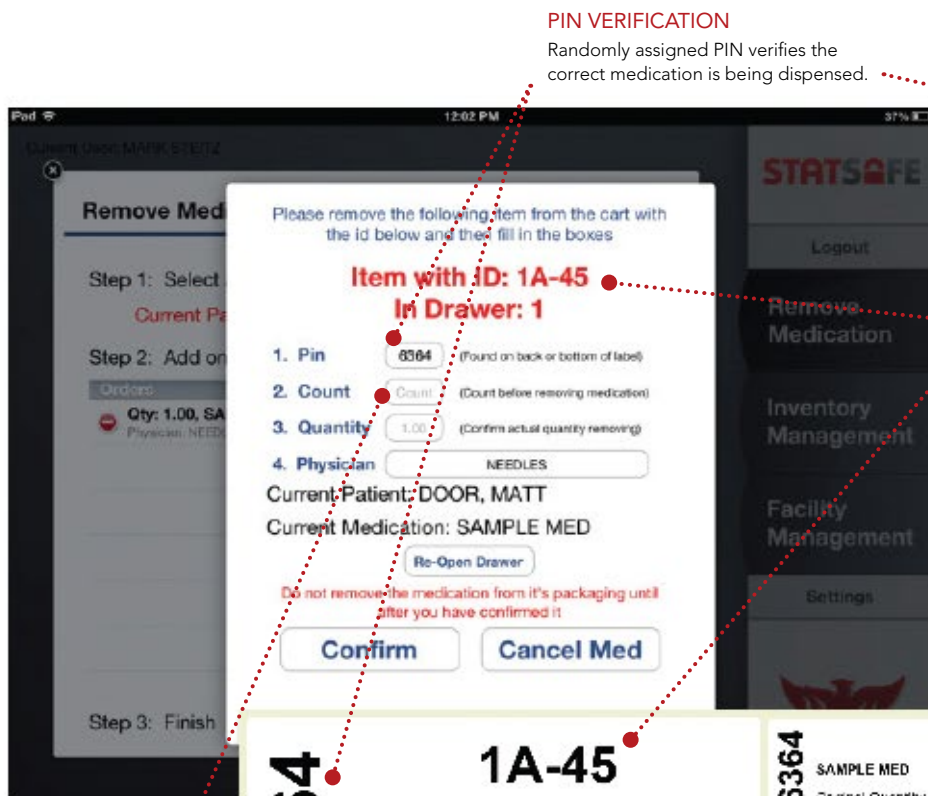

UNEXPECTED COUNT

When a blind count is entered incorrectly a re-verify count notice appears. The transaction will complete if the re-verified count is incorrect. A Discrepancy Alert will appear, see below.

DISCREPANCY ALERT

When a blind count is re-verified incorrectly, a Discrepancy Alert appears on the home screen until it is documented & resolved by a supervisor.

PIN VERIFICATION

Randomly assigned PIN verifies the correct medication is being dispensed.

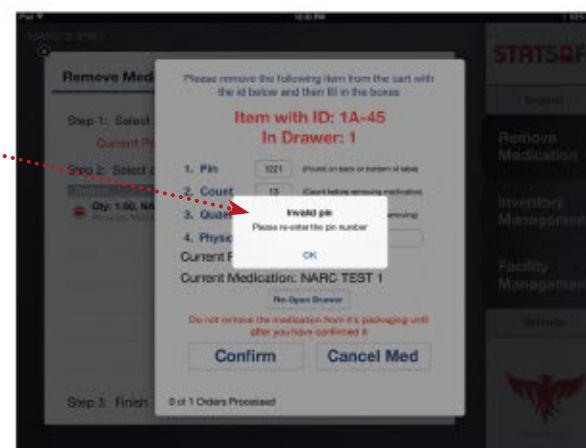

ORGANIZATION

Easy to understand serial numbers organize the medication for easy placement and retrieval.

1 = Drawer number

A = Row

45 = Numeric position

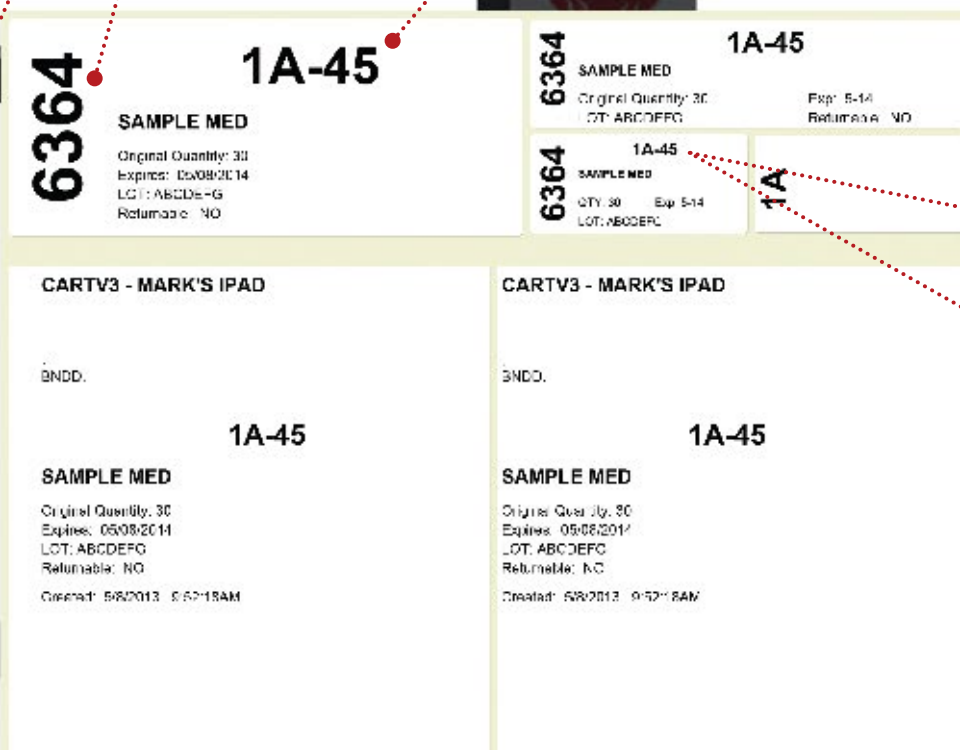

PIN CONFIRMATION

An incorrect PIN halts the transaction until the correct PIN is entered.

BLIND COUNT

Blind-count audit at dispense. In addition, elective blind count audits for individual drawers, narc box or the entire cart.

ANY PACKAGE

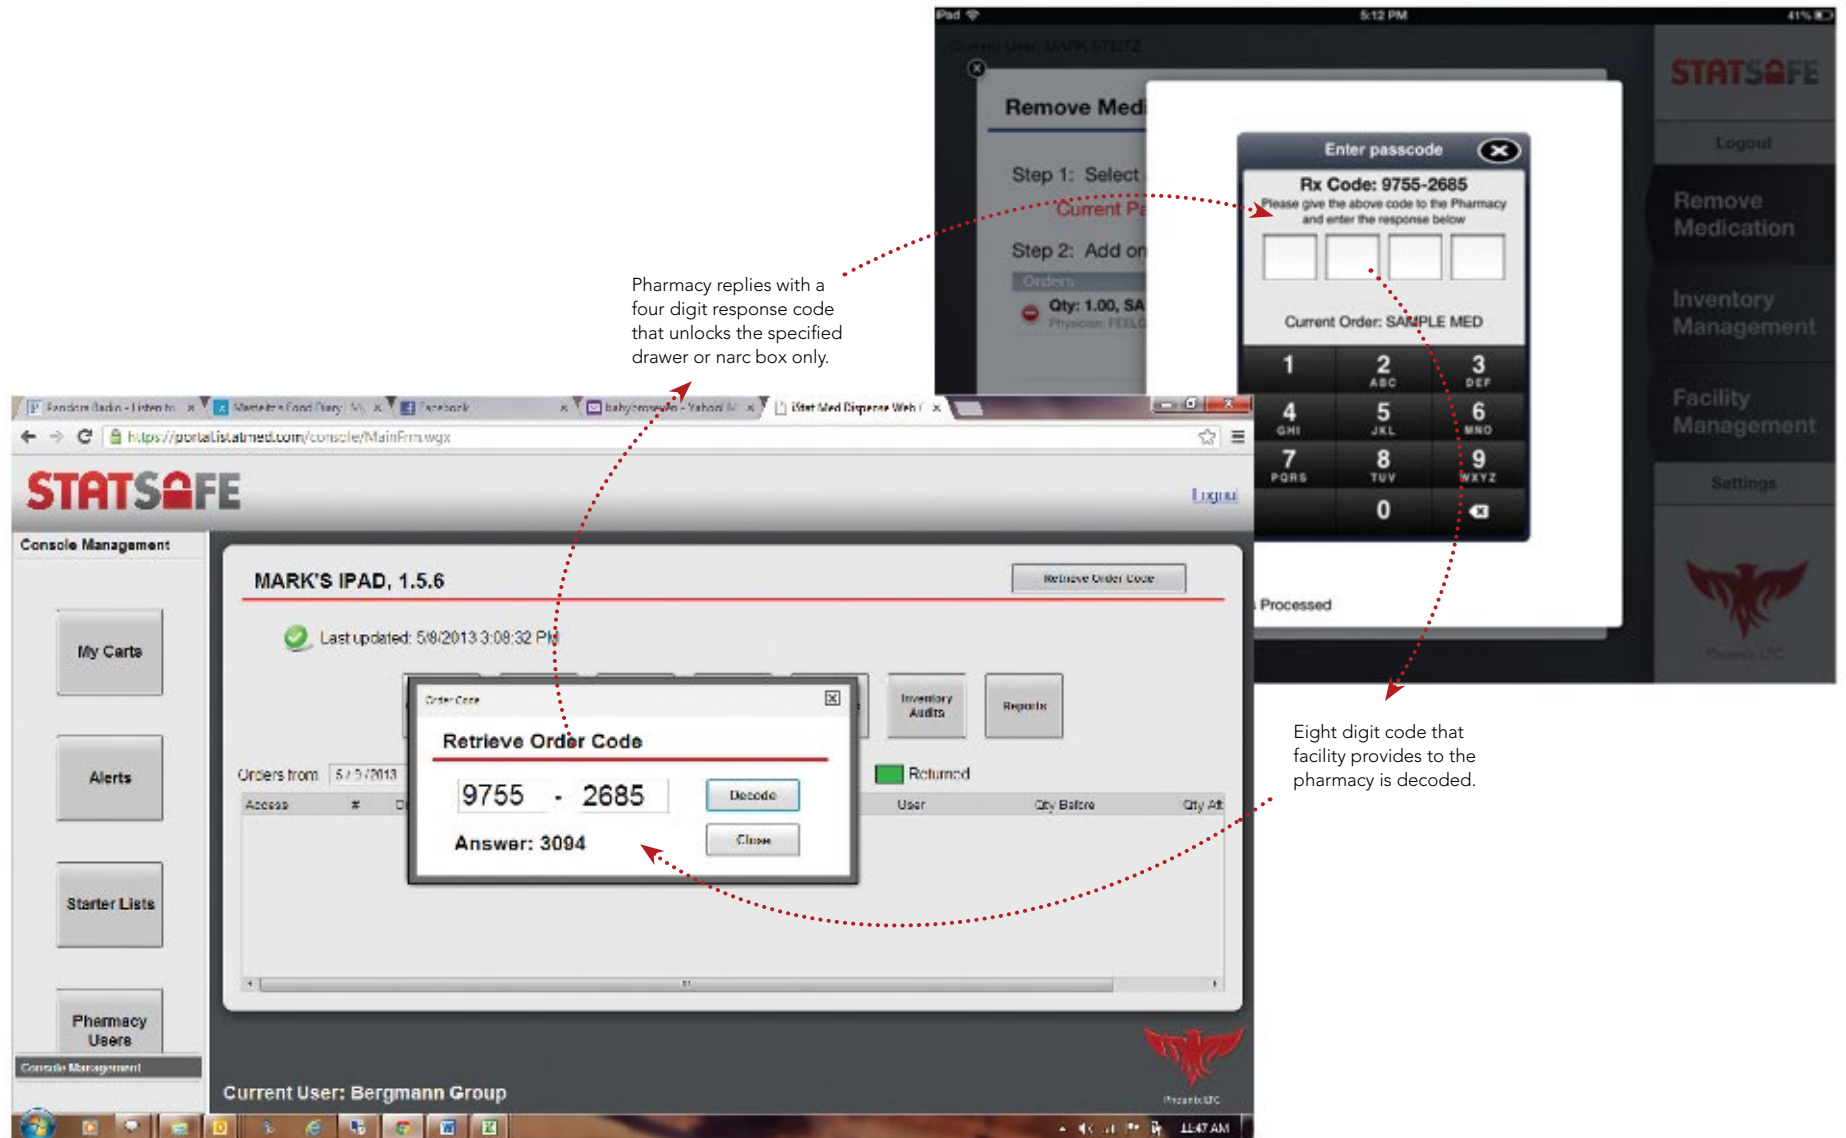

Multiple label options to fit the package of your choice.

SECURITY

There are a number of security features to pick from that will expose inventory indiscretions.

UNIQUE PIN

Facility screen halts progress until pharmacy provides response code.

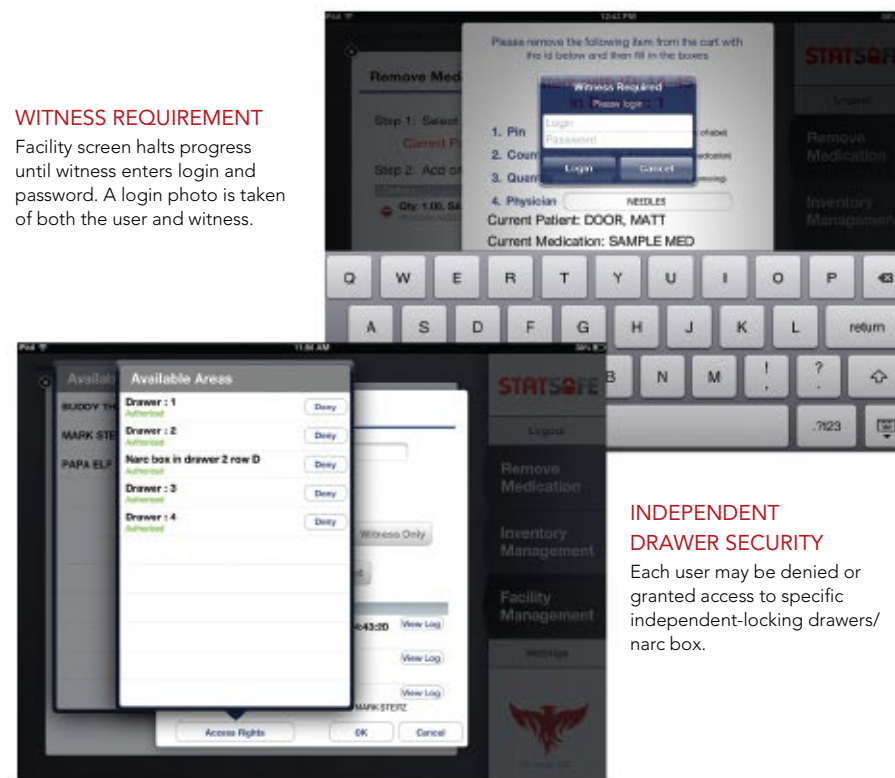

ACCESS VERIFICATION

At each and every login session, a new photo is taken and attached to each time-stamped transaction.

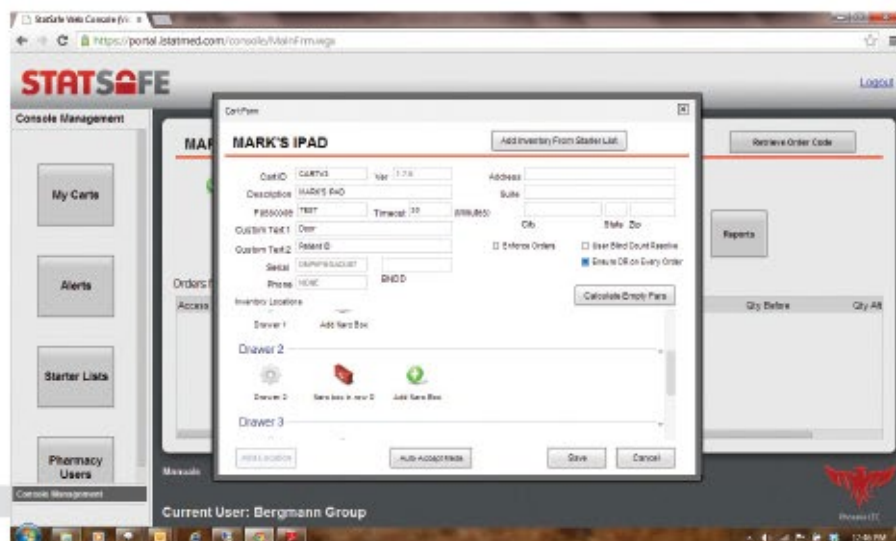

WITNESS REQUIREMENT

Facility screen halts progress until witness enters login and password. A login photo is taken of both the user and witness.

INDEPENDENT DRAWER SECURITY

Each user may be denied or granted access to specific independent-locking drawers/ narc box.

INFORMATION RICH

Anytime, anywhere access to real-time information that is accessible via the StatSafe Web Portal. The pharmacy manages all facets of the system including inventory, expiring meds, staff, users, patients, drawer configuration, and more via the web portal.

RAPID RESPONSE WARRANTY

We pledge to resolve matters within one business day or less.
