

# STATSAFE

MEDICATION MANAGEMENT

**PHOENIX LTC**  
MED CARTS

# StatSafe Overview

<https://youtu.be/WGamw34m3t8>

# Safety & Security

**NO NEED TO COMPROMISE SAFETY FOR AFFORDABILITY!**

## TRANSACTION SPECIFIC SECURITY

Medication access is only granted to the specific drawer or bin, not the entire cabinet.

## DRAWER STATUS LIGHT

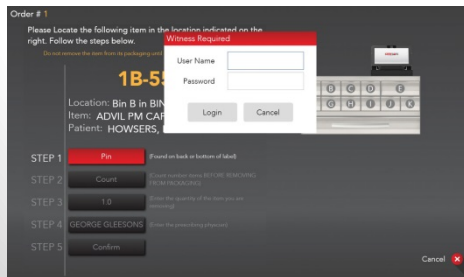

The light illuminates indicating that the corresponding drawer is unlocked.

## OPTIONAL AUTOMATIC NARC BOX

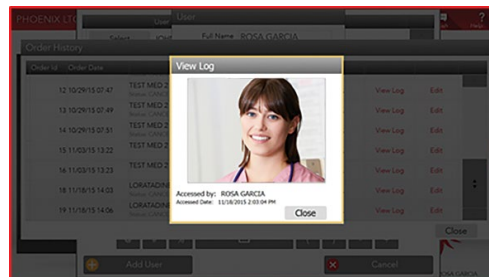

9" drawers can house an automatic unlocking narc box.

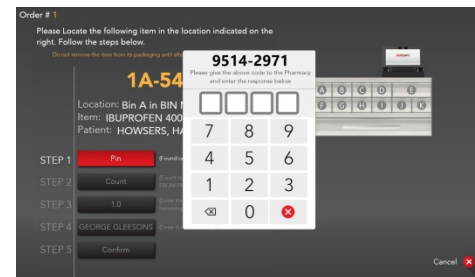

**STATSAFE FEATURES ADDITIONAL DRAWER-SPECIFIC SECURITY OPTIONS SUCH AS:**

Witness requirement

Tracing each activity with a time-stamped photo

One-time use pin

# Safety & Security

**PATIENT SAFETY IS FIRST & FOREMOST WITH STATSAFE!**

Our unique 2D barcoded-PIN assures the correct “pharmacist-verified package” has been selected.

The med data and patient information may be printed on a receipt to accompany the dose on its delivery to the patient.

# Intuitive & Easy to Use

**STATSAFE IS THE DEFINITION OF “INTUITIVE & ADAPTABLE!”**

If you've ever used an ATM before, then you are ready to use the StatSafe's intuitive touch screen app. Dispense a med in a few easy steps and moments later be caring for your residents again.

StatSafe's unique AutoAdapt inventory-system adjusts automatically to updates and changes with flexible inventory-positions.

Each med is assigned a unique ID describing the drawer and row with a unique numeric-position. The position moves forward as items are depleted and restocks are assigned a new ID behind it.

AutoAdapt keeps track of it all!
